

THE 100% DIFFERENCE

Let's talk
over a cup
of coffee.
Our treat!

If hindsight
is 20/20,
we give you
perfect
vision.

Every Claim. Every Possible Dollar.

We provide claims audits exclusively for self-insured employers. A comprehensive audit helps you see the whole picture. It costs no more in time or money than a random sample audit, but it ensures that we can recover every possible dollar and identify systemic errors, leading to future savings.

It is what we do. It is all we do.

Every Possible Dollar.

Your company's financial interest is our No.1 priority.
Performing an annual healthcare claims audit:

- Improves your bottom line
- Satisfies fiduciary responsibility
- Avoids the two-year "no recovery" trap

TYPICAL Industry Audit

FOCUS: Analyzing ALL claims data to find errors

FOCUS: Establishing an acceptable error rate
(missed opportunity to find systemic errors or large one-off mistakes)

OUTCOME: Recovered dollars returned to you, the client

OUTCOME: Likely low audit findings

COST: Pays for itself through recoveries

COST: Borne by the client
(typically, fixed-fee arrangement)

IMPACT: Respectful relationship with your TPA to uncover root cause of errors for future cost savings

IMPACT: Payers are often unwilling to correct all claims affected by a random sample audit finding

SMALL CLAIMS: 100% Difference means thousands of claims add up to thousands of dollars

SMALL CLAIMS: Typical audits randomly select a small percentage of claims in each lower-dollar category
(possible systemic error patterns overlooked, missing broader savings)

Healthcare Horizons' 100% Difference means more real dollars to you.

More than **\$80 million** recovered for our clients
